

Hello_Server Release V0.91

User Manual

Hello_Server is a standalone application which is used for Unlocking Motorola Phones by Code.

All codes will be returned directly, so there is no need to wait for supplier or resellers like in the past.

This first Release is for Windows PC, other Platforms will follow day by day. Mac OS, Linux, PDA, Pocket PC, Symbian... So u will be able to use your Client on any system you prefer.

Here the Details:

Picture_1: Overview of the Client

The screenshot displays the client interface for 'INDUSTRIES GPG'. It features a login section with fields for 'USER' and 'PWD', a 'RELOAD' button, and a 'CREDITS / DAILY LIMIT' indicator showing '7/10'. Below the login section, there is a list of phone numbers and their corresponding status (OK or WRONG). A 'SEND IMEIS' button is located below this list. To the right, a table provides a detailed overview of the unlocked phones, including their date, IMEI, code, state, and percent. A 'CLEAR CLIPS' button is positioned at the bottom left. A small cartoon character is visible in the bottom right corner of the interface.

Date	Imei	Code	State	Percent

Here you can see an overview of the panel, we set up the client very easy to use for anybody. We keep it smooth and simple to provide a running system which dont needs any unnecessary software to make it work proper, just a small client. Nothing else.

Picture_2: Username & Password

A screenshot of a login interface. It features two input fields: the top one is labeled 'USER' and the bottom one is labeled 'PWD'. The 'PWD' field contains a series of asterisks. Below the fields is a button labeled 'RELOAD'.

In order to access your Account, you need to type in your Username into the *USER* field, and Password into the *PASS* field. Then Click Reload and your Status will be Displayed on the upper right corner(Picturer_3).

Picture_3: Status

Here is your Status Displayed, on the left, in this case „7“ are your Credits, which you have left for the Day. On the right „10“ is your Daily Limit.

Hello_Moto is coming up with different Account Types, which are all same in function, but different in Daily Limits.

You have the possibility to change your Account Type at any time by upgrading to a next higher Account.

For example: You have Account Type 1, which is 3 Daily Limit, but you need 10 Codes a Day, simply contact your reseller and he gives you new username and password to get instant the new Account.

IMPORTANT: only upgrading is allowed, downgrading to lower Accounts is not possible !!!

Picture_4: Send & Check Imeis

Here you can easily paste or Type your Imei Numbers, the system will make check before sending them to the Server. If the Imei is not OK, then it will be marked as WRONG, this can cause different Problems:

- The Imei is NOT 15 digit
- The Imei has wrong checksum, this means one of the digits is wrong
- Model is not supported

Below we have listed some unsupported Models, in future Updates we will also implement the causing of errors. So in order to get as much as possible good codes, check the list please and only type in supported phones Imeis.

Picture_5: Status of Process

Date	Imei	Code	State	Percent

the Status of Process Window is the most important of all. Here you can check your Process of your request.

You have the Option to sort the List by Date, Imei, Code and State.

The Percent Tab (function will be added in next update) will always show you the time in percents till your Code comes to your Client. Please use the Reload button(Picture_2) from time to time in case your internet connection is bad or your PC hangs.

Picture_6: Clips

This function allows you easily to copy your Imei with the right code into a .txt file or messenger. Simply click with left mouse button once on the Imei which u need in the „**Status of Process**“ Window(Picture_5). The Imei and its Code will be copied to the **Clips** so u can easily handle it to forward it or to save it. For Clearing the Imeis simply click CLEAR CLIPS button.

UNSUPPORTED MODELS and Providers:

All Cingular, AT&T

- V3X
- V3XX
- Imeis which not starts with 35
